

Insurtech Professional Program

In collaboration with GIFT International Fintech Institute (GIFT ifi), Gandhinagar and consortium of Ahmedabad University, IIT Gandhinagar and UC San Diego

Offered by NeoProEd Private Limited

GIFT ifi

INTERNATIONAL FINTECH
INSTITUTE

UC San Diego

in collaboration with

NeoProEd

About the Programme

Every insurer, broker, and TPA is now a technology organisation - whether they chose to be or not. Decisions about distribution, underwriting, claims, and operations are inseparable from technology. Yet most professionals navigate this reality without a complete picture of the ecosystem they are operating in.

The Insurtech Professional Program is built for that professional. Not just for Insurtech companies - for every team in insurance that develops, evaluates, or is affected by technology solutions.

What makes this program different is who delivers it. Sessions are led by founders who have built Insurtech businesses in India, CXOs of insurance organisations, and senior practitioners currently active in the industry. Not theory. The people who built what is shaping this industry today.

This programme is designed to reinforce that overarching view. Whether you are designing a new product, evaluating a technology solution, building a distribution strategy, or solving a claims problem - understanding the full ecosystem makes you better at it. It sharpens decision-making, improves solutioning, and gives you the context to collaborate more effectively across functions.

The programme runs over 10 weeks of live online sessions, anchored in India and global case studies, and closes with a 2-day residential at GIFT City, Gandhinagar. Participants receive a certificate from GIFT ifi and powered by NeoProEd on completion.

Who Should Attend

- Insurance professionals across underwriting, distribution, claims, and operations- across Insurance companies, Brokers, TPAs
- Insurtech and Fintech product and technology teams
- Technology professionals, consultants and advisors working with insurance or Insurtech organisations
- Professionals from adjacent sectors building into insurance

Curriculum Overview

Ten weeks of live online sessions across eight modules, closing with a 2-day residential capstone at GIFT City, Gandhinagar. Every module pairs the conceptual foundation with real applications - anchored in India and global case studies.

#	Module	What It Covers
M1	Ecosystem & Foundations	India and global insurance landscape - players, categories, business models, and how AI is beginning to reshape the sector.

#	Module	What It Covers
M2	Regulation & Compliance	IRDAI, IFSCA, Insurance Amendment Act 2024, and the GIFT IFSC regulatory environment - the reasoning behind the rules, not just the rules themselves.
M3	Bima Trinity	Bima Sugam, Bima Vistar, and Bima Vahak - what each initiative is, how it works, and the opportunity it creates for Insurtechs and incumbents.
M4	DPDP Act 2023 & Rules 2025	Consent architecture, data sharing obligations, AA framework, and cybersecurity requirements - as design constraints, not compliance checklists.
M5	Technology Landscape	What is actually deployed today across insurers, brokers, and Insurtechs in India - and where the real gaps between capability and potential exist.
M6	Core Functions	Underwriting, distribution, claims, and operations - how each works today and how Insurtech is changing it, with India and global case studies across every vertical. Founders and practitioners who have actually built Insurtech businesses in India bring their experience directly into the room Participants get an inside view of how India's most innovative insurance businesses were built and the global models that are driving the next wave of innovation - from markets that are ahead of the curve and offer a clear view of where India is heading. For anyone looking to build, scale, or transform - this is the module that shows what is genuinely possible.
M7	Problems, Solutions & Strategy	Real industry problems, global solutions, and a structured framework for identifying opportunities and building the case for change in your organisation.
M8	Professional Skills	Communication, collaboration, and customer orientation - the habits that distinguish effective practitioners, developed through practical application.
Capstone	Residential at GIFT ifi, Gandhinagar	2-day residential at GIFT City: Orientation, Mentor-led team working, Networking dinner, Team presentations to a professional jury, followed by the Certificate ceremony.

Faculty

Sessions are delivered exclusively by practising professionals - founders of active Insurtechs, CEOs, and CXOs currently working in the industry. Participants learn directly from those who have built, led, and transformed the sector.

Faculty	Current Role
Anand Choudhary	Executive Partner, ElpeeCo.
Gagan Sethi	CEO, Ebix Technologies, USA
Krishnan Venkatachalam	Principal Director, iNube Former Head, Microinsurance, AIG
Mitesh Jain	Co-founder & CTO, Symbo
Prerak Sethi	Co-founder, India InsurTech Association Founder, RIA Insurance
Sachin Seth	Regional M.D., South Asia, CRIF Group, Italy
Shailaja Lall	Partner, Shardul Amarchand Mangaldas & Co.
Sneha Gokarn	Co-founder, NeoProEd Former CEO, Gallagher India
Sorabh Bhandari	Co-founder, Riskcovry
Suvendu Prusty	Founder Director, Riskcovry
Yashesh Sampat	Co-founder, NeoProEd CII Member, FIII and Visting faculty

What You Gain on Completion

Everything you need to navigate or advance in India's Insurance and Insurtech sector. The insider access to the world of Insurance and Insurtech.

 <p>Complete ecosystem view A structured, end-to-end understanding of the insurance and Insurtech landscape — regulatory, technology, and business models.</p>	 <p>Learning from those who built it Sessions by founders of Insurtech businesses and CXOs of insurance organisations — the practitioners shaping this industry.</p>	 <p>India + global case studies Real deployments, operating models, and transformation journeys — anchored in India, informed by global markets ahead of the curve.</p>
 <p>GIFT City residential capstone 2-day immersive experience at India's international financial services hub — orientation, mentor-led problem solving, jury presentations.</p>	 <p>A co-badged credential A NeoProEd and GIFT IFI certificate carrying the institutional weight of India's international financial services institute.</p>	 <p>Alumni network access Entry into a growing professional network of IPP alumni for ongoing exchange of ideas, opportunities, and industry intelligence.</p>

How It Applies to Your Work

The programme builds applied knowledge that participants carry back directly into their roles - across every function in insurance.

<p>Embedded Insurance & Affinity Understand how embedded models and API distribution are being built and deployed - and how to assess, partner with, or develop similar capabilities within your organisation.</p>	<p>Underwriting & Product Learn how new product structures - parametric, usage-based, on-demand - are being designed, and how to think about product development for emerging distribution and customer contexts.</p>
<p>Claims & Servicing Understand what digital claims processing, straight-through processing, and health cashless automation look like in practice - and where the genuine gaps between aspiration and deployment still exist.</p>	<p>Strategy & Technology Apply a structured approach to identifying opportunities, evaluating technology options, and building the internal case for change within your organisation.</p>
